### **DETAILED ACTION**

1. The application filed April 22, 2004 is presented for examination and claims 1-31 are pending.

#### ***Allowable Subject Matter***

2. Claims 1 to 31 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a liquid crystal display panel apparatus.

Independent claim 1 identifies a uniquely distinct feature "a driving unit for receiving image data and said plurality of voltages output by said reference voltage generating unit and for selectively outputting one of said plurality of voltages and a plurality of voltages generated therefrom by voltage division by using resistors according to a value of said image data, for applying the voltage to a terminal of a pixel of a liquid crystal display panel".

Independent claim 2 identifies a uniquely distinct feature "a driving unit for receiving image data and said plurality of voltages output by said reference voltage generating unit and for selectively outputting one of said plurality of voltages and a plurality of voltages generated therefrom by voltage division by using resistors according to a value of said image data, for applying the voltage to a terminal of a pixel of a liquid crystal display panel, as well as for outputting a median voltage between the

first potential and the second potential for applying the voltage to the other terminal of a pixel of said liquid crystal display panel”.

Independent claim 3 identifies a uniquely distinct feature “a driving unit for receiving image data and said plurality of voltages output by said reference voltage generating unit and for selectively outputting one of said plurality of voltages and a plurality of voltages generated therefrom by voltage division by using resistors according to a value of said image data, for applying the voltage to a terminal of a pixel of a liquid crystal display panel, as well as for outputting the first potential in the first mode and the second potential in the second mode for applying the voltage to the other terminal of a pixel of said liquid crystal display panel.”

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morita (Patent # 7,106,321).

The closest art, Morita as discussed above, either singularly or in combination, fails to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
